# **ABOUT US**

AluVerve Shiplap Aluminum System mimics the appearance of timber or wood but is actually made of aluminum. This type of ceiling system / cladding system combines the aesthetic appeal of wood with the practical advantages of aluminum, such as durability, low maintenance, and resistance to moisture and pests.

## **Key features of an AluVerve Shiplap Aluminum System include:**

- ✓ **Material:**  
The primary material used is aluminum, grade 6063-T5, which is known for its lightweight nature, corrosion resistance, and versatility in design.
- ✓ **Aesthetic Appeal:**  
AluVerve Shiplap Aluminum System is designed to replicate the natural look and feel of timber or wood, providing a warm and inviting atmosphere.
- ✓ **Customization:**  
AluVerve Shiplap Aluminum System allows for customization in terms of colors, providing flexibility to match various design preferences and architectural styles.
- ✓ **Fire Resistance:**  
Aluminum material is inherently fire-resistant, providing an added layer of safety in building design.
- ✓ **Easy Installation:**  
AluVerve Shiplap Aluminum System are generally easier to install compared to traditional wood systems. The lightweight nature of aluminum simplifies handling and installation.
- ✓ **Low Maintenance:**  
AluVerve Shiplap Aluminum System is resistant to rot, decay, and pests, making it a low maintenance option for ceiling systems. This is especially advantageous in Singapore with high humidity or potential exposure to the elements.
- ✓ **Environmentally Friendly:**  
As aluminum material is recyclable, AluVerve Shiplap Aluminum System contributes to sustainability efforts by reducing the demand for new raw materials.
